Detica Group plc (DCA.L) ("Detica"), the information intelligence specialist, is pleased to note the following announcement.

Trusted Borders signs addendum with UK Home Office for e-Borders project

Trusted Borders, a consortium of companies led by Raytheon Systems Limited of the UK, and including Detica, has signed an addendum to the contract originally signed in November 2007 providing the Home Office with extended functionality and services in respect of the nation's e-Borders programme, an advanced border control and security programme.

The Trusted Borders consortium has started to develop and build upon the country's current pilot programme for border management and will be expanding it into a fully flexible, scalable and robust e-Borders capability within two years.

Detica is responsible for the intelligence and analytics services in the e-Borders programme. The value of this contract addendum to Detica is approximately £25 million, the majority of which will be recognised over the first four to five years of the contract.

Notes to Editors

About e-Borders

The e-Borders Programme is a multi-agency, technology-enabled business change programme which will create a joined-up, modernised border control and security framework for the United Kingdom.

e-Borders will collect and analyse passenger and crew data, provided by carriers (air, sea and rail), in respect of all journeys to and from the UK in advance of their travel. This will support an intelligence-led approach to operating border controls, by identifying those involved in abuse of UK immigration laws, serious and organised crime and terrorism.

RECEIVED
09 FEB 21 A 8 27
HOMERIDGE

Border control agencies include Immigration service, Police service, Serious and Organised Crime Agency, Customs and UKvisas.

The e-Borders programme will cover all carriers operating to and from the UK. It builds upon the successes of Project Semaphore, the de-risking pilot for the e-Borders programme which currently captures passenger information from a limited number of carriers on routes that have been identified as high risk.

By harnessing passenger information, performing risk assessments on passengers planning to enter or leave the UK and utilising new developments in technology which allow the swift and secure transfer of data, e-Borders will, in effect, export the border and provide more effective levels of border control and deliver faster processing and greater flexibility in control operations.
